

BE281 Seminar Series

2016 Fall Quarter

Department of
Bioengineering
and
Institute of
Engineering in
Medicine

FRIDAYS
2-3 PM

Fung Auditorium,
Powell-Focht
Bioengineering Hall

Faculty host:
Dr. Robert Sah

September 23

Hsian-Rong Tseng, Ph.D.

UC Los Angeles

Nano Velcro-Embedded Microchips for Isolation and Characterization of Circulating Rare Cells in Blood Towards Non-Invasive Cancer & Prenatal Diagnostics

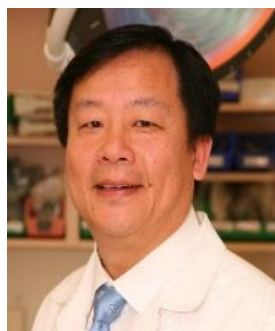

September 30

Christian Metallo, Ph.D.

UC San Diego

Studying Metabolism for Flux Sake (and to Help People)

October 14

James Dunn, M.D., Ph.D.

UC Los Angeles

Intestinal Bioengineering

October 21

Karen Christman, Ph.D.

UC San Diego

Injectable Biomaterial Platforms for Treating Cardiovascular Disease

October 28

Alan Grodzinsky, Sc.D.

50th Anniversary Speaker

Massachusetts Institute of Technology

Aggrecan Nanomechanics: Relevance to Cartilage Function, Drug Discovery, and Drug Delivery

November 4

Alan Saltiel, Ph.D.

UC San Diego

Inflammatory Links between Obesity and Type 2 Diabetes

December 2

James Perry, M.D.

UC San Diego

Translational Research in Congenital Heart Disease: Current Progress and Future Opportunities
